THE CONTEST

The concept was determined by the idea of creating a space suitable for different activities, a urban oasis where the students, professors and other visitors can spend their time in between classes or after they finish a busy working day. This space can be a valuable asset for the city also. The concept is called Modular Garden and is based on sustainable design solutions and the capacity to transform according to its users and their activities. In the present society is essential to create spaces that enhance and strengthen the relation between people and nature. Nature can have multiple benefits: from social, psychological benefits to
