

Horticulture & Business Management

'A highlight of the study so far has been the numerous visits to companies across many domains of the sector, as well as the freedom in a lot of our study to pursue the things that we are interested in.'

Ali – Student Horticulture & Business Management

HAS IT ALL

In short

Did you know the Netherlands is the second largest exporter of vegetables, flowers, and other agricultural products? It makes sense, therefore, that other countries would like to learn from our expertise in the field of horticulture. In the English-taught bachelor's programme Horticulture & Business Management you will learn all about cultivation and business to become an all-round professional in horticulture. All this is set in an international environment, with students from all over the world.

- + Focus on high tech cultivation based on the Dutch situation and developments.
- + Building your professional network through projects in collaboration with companies in the horticultural sector.

Admission Requirements

The admission requirement is a secondary school diploma which is equivalent to a Dutch havo/vwo diploma with the final-year subject mathematics and chemistry. To find out how your diploma is valued in the Netherlands, check nuffic.nl/en.

Do you want to know if the programme suits you? We offer a study choice check. For this, please contact our study advisor. The study choice check is mandatory for the Horticulture and Business Management programme.

English Language Requirements

Students who have completed their previous education in English are exempted from this requirement. All other students need to provide proof that they are proficient in the English language. HAS advises the IELTS language test ielts.org. Overall band score (academic programme) must be at least 6.0. For more information about the other accepted tests TOEFL and Cambridge ESOL certificate, see our website.

Further studies

"Around 15-20% of HBM graduates pursue a Master's degree, most often in the Netherlands e.g. Wageningen or abroad, in fields such as plant sciences, breeding, resilient farming, or business and economics."
